BTEC Assignment Brief

Qualification	Pearson BTEC Level 3 International Subsidiary Diploma in Travel and Tourism Pearson BTEC Level 3 International Foundation Diploma in Travel and Tourism Pearson BTEC Level 3 International Diploma in Travel and Tourism Pearson BTEC Level 3 International Extended Diploma in Travel and Tourism
Unit number and title	**Unit 10: Global and Domestic Passenger Transport**
Learning aim	B: Investigate global and domestic passenger transport hub locations and facilities, including how products and services offered by transport organisations meet the needs of passengers
Assignment title	How the world transport system works.
Assessor	
Issue date	
Hand in deadline	

Vocational Scenario or Context	You work in the long-haul department of a tour operator. Your passengers increasingly wish to experience a range of destinations on their travels which makes putting together transport options more complex. You have been tasked with putting together a slideshow presentation for your peers that will show the results from an investigation into passenger transport hub locations and facilities across the world. You will also include details on how the products and services offered by transport organisations could meet the needs of your passengers.
	Your slideshow presentation should include: **Introduction** • Detailed maps showing the busiest popular travel routes by road, rail, air and sea on a global scale. You will also include an explanation of how the facilities offered at these major transport hubs meet the needs of passengers. Specific examples should be included. **Presenting and assessment** • Your assessor will provide you with details of a complex domestic journey for specific passengers. • You will present three different transport options for this journey and assess the advantages and disadvantages of these differing transport options in terms of how each meets the needs of the specified

	passengers. **Evaluation** • You will provide a comprehensive evaluation of the location and facilities offered at a range of major global transport hubs. These hubs should cover all four transport methods with at least two examples from each method. • You should consider how well these hubs, and a range of the transport organisations operating out of these hubs, meet passenger needs with consideration given to the type and length of journeys involved.
Checklist of evidence required	Slideshow presentation

Criteria covered by this task:	
Unit/Criteria reference	To achieve the criteria you must show that you are able to:
B.P3	Locate popular air, road, sea and rail routes globally and explain how facilities at the major transport hubs meet passenger needs.
B.P4	Explain how different types of transport organisations provide or the specific and general needs of passengers.
B.M2	Assess transport hub facilities, products and services for different transport options for one complex journey in your own country and how well each meets passenger needs.
B.D2	Evaluate to what extent location and passenger needs influence facilities offered at major global transport hubs and whether the needs of passengers are met by different hubs and transport organisations
